

61  
a catalytic converter for deriving heat provided by  
said internal combustion engine;  
an open system including said catalytic converter  
coupled to an inlet for receiving ambient pollutants.

---

REMARKS

Claims 21 and 22 are added prior to first office  
action and are patterned along the lines of claim 18  
directed to the ambient pollutant processing features  
of the invention. Antecedent support therefor is found  
at least at page 17, beginning at line 14.

Respectfully submitted,

  
Conrad O. Gardner  
Applicant
